PROJECTS

Calling CRM System | Python, Flask, MySQL, HTML, CSS, JavaScript

Nspira management services Pvt. Ltd.

- Developed a role-based admission lead management CRM for tracking leads, calls, follow-ups, remarks, status, and branch operations.
- Designed MySQL database tables for leads, users, branches, allocations, and call history.
- Implemented role-based access for Admin, Branch Manager, Tele-caller, Counsellor, and PRO users with branch-level data visibility.
- Built a manual lead allocation workflow controlled by Branch Managers.
- Implemented calling history and last-called-date tracking along with lead status/sub-status workflows.
- Developed CRM dashboards and interfaces for monitoring lead activity and operational performance.
-

Employee Attendance Analytics Dashboard | HTML, CSS, JavaScript, Excel

Nspira management services Pvt. Ltd.

- Developed a responsive dashboard for employee attendance management and reporting.
- Integrated Excel-based data processing to evaluate reporting times, late arrivals, leave records, and attendance trends.

Agra Zone Admission Planning & Tracking Dashboard | HTML, CSS, JavaScript, Excel

Nspira management services Pvt. Ltd.

- Developed a live dashboard to track admission target achievement, branch occupancy, seat availability, and projected student strength (STR) for upcoming academic sessions.
- Automated Excel-based reporting and created interactive visualizations for branch-wise performance analysis and admission forecasting.
- Enabled data-driven admission planning through real-time KPI monitoring and trend analysis.
